

Dear Candidate,

Please print the immigration survey below. Fill it out, sign it, and mail/fax it to one of the addresses below.

Over the last decade, the news media and voters have made "Immigration Grade Cards" and "Immigration Candidate Comparison Pages" their No. 1 source for the immigration actions and the immigration positions of congressional incumbents and challengers.

If you want voters to know your immigration positions, you will want to return this Survey to us as soon as possible. NumbersUSA has more than 9 million citizens in its online networks.

We begin emailing Candidate Comparison Pages to our activists in January of an election year. At first, we mail monthly, and then weekly and finally daily just before the Primary and General elections.

NumbersUSA never endorses candidates. We recognize that voters mark their ballot based on many issues and judgments about the character and leadership of a candidate. What we offer on our Grade Cards and Candidate Pages is a way for voters to know which candidates are most likely to reduce overall illegal and legal immigration and which are most likely to increase it so they can factor that into their voting decisions. (We favor reducing the numbers.)

You can view a sample Candidate Comparison Page at <https://www.numbersusa.com/candidate-comparison/election/2018>. If you have any questions, please contact elections2018@numbersusa.com. Also, you may use that contact if you wish to later amend your survey in any way.

Thank you for returning the survey,

1.) Oppose Chain Migration? Should Congress implement the bipartisan U.S. Commission on Immigration Reform (the Jordan Commission) recommendation to limit family-based immigration to the nuclear family of spouse and minor children, thus eliminating the "chain migration" categories of extended family that are the key reason immigration has quadrupled since the 1960s?

7.) Support a Reduction in Total Immigration? Until 1990, U.S. immigration tradition was an average of around 325,000 a year; since new legislation in 1990, it has averaged 1,000,000 a year. More than 44 million foreign-born individuals now live and work in the U.S. At current rates, immigration will add more than 100 million additional people to the U.S. population by 2065. This government-forced rapid population expansion will require huge increases in government expenditures for roads, bridges, sewage treatment, schools, and other infrastructure and services. Polling finds that most Americans in every region of the country believe this immigration-driven population growth will harm their quality of life. Do you favor reducing overall immigration numbers?
